

**BIOLOGICAL RECORDS No. 12. 1968**

compiled by Mary Hazelton

The following lists are of the invertebrate fauna found in caves, mines, springs and gravel beds, as recorded in the Biological Records of the Cave Research Group of Great Britain, except where otherwise stated. All the fauna recorded has been identified by a recognised authority, and the field work has mostly been done by members of the Cave Research Group, and by members of affiliated Clubs.
