G.M.Spooner			ORDER & FAMILY	SPECIES & AUTHORITY.
		Ref. NATURE April 1961 pp 104 105		
3.5.60		Moortown. Tavistock. Devon. Spring emerging in field on slopes of Dartmoor. 560ft. above sea level on metamorphosed slate, about 6 mile from edge of granite outcrop. At point of issue a rough conduit had been made with flat stones under which the water flowed over a small accumulation of stones & gravel. Handfuls of the latter were swilled in a bucket & the water strained off.	CRUSTACEA SYNCARIDA Bathynellidae	<u>Bathynella natans</u> Vejd. Det. G.M.Spooner 1 single adult specimen.
			CRUSTACEA AMPHIPODA Gammaridae	<u>Niphargus glenniei</u> Spooner Several specimens (in 2 springs at 700 & 560ft. O.D.)
May 1960		Well nr. S. Brent (Moorgate, Wrayton at edge of granite)	CRUSTACEA AMPHIPODA Gammaridae	<u>Niphargus glenniei</u> Spooner 1 specimen.
Early May 1960		River Plym above Cadover Bridge Dartmoor Devon. A pit was dug in a gravel spit alongside river on S.W. Dartmoor at 696ft above sea level. Ground water reached just below 1ft & gravel dug out for another foot. Gravel removed consisted mainly of granite fragments with a little detritus. It was washed & washings strained off, as well as much water that constantly seeped into the pit.	CRUSTACEA SYNCARIDA Bathynellidae AMPHIPODA Gammaridae	<u>Bathynella natans</u> Vejd Det. Spooner 12 specimens mostly juvenile <u>Niphargus glenniei</u> Spooner 4 specimens at 700ft. O.D.
27.5.60		Second pit dug close at hand on May 27th in warmer weather, yielded 2 specimens of <u>Bathynella</u> at lowest level dug. Very soft. peaty acidic water.
